The Role of a Scientist in the Zika Virus Outbreak Response

Did you know that only female mosquitoes bite? Or that mosquito-borne viruses, like Zika, dengue, and yellow fever depend on infected humans to move far distances? Join LSU School of Veterinary Medicine’s Assistant Professor Rebecca Christofferson for a discussion regarding mosquito-borne viruses and her role in the response to the recent Zika outbreak in South America.

Rebecca C. Christofferson, Ph.D.
Assistant Professor
School of Veterinary Medicine
Louisiana State University, Baton Rouge LA

Date: Thursday, October 12th
Time: 5:00-5:45 PM
Place: Guzman Lecture Hall

Open to all members of the Dominican campus community
