Abstract
Vertical violence is defined as any act of violence including yelling, snide comments, withholding information, ignoring, and humiliating behaviors. It occurs between two or more persons on different levels of a hierarchical system. It prohibits professional performance and satisfaction within the workplace. The purpose of this literature review is to explore the attitudes and biases of staff nurses when working with students.

Problem Statement
Vertical violence is an ongoing problem in the nursing profession. It affects hospital units where newly graduated nurses are needed the most. Gap of knowledge of why staff nurses are holding biases against the students, and how communication and teamwork between the two can be improved.

Literary Findings

Factors Improving Staff and Student Relationships

- Implementation of mentor education for staff nurses
- Staff nurses viewing student nurses as help instead of hindrance
- Clarification of student capabilities and goals
- Staff nurse support by unit manager and student's clinical instructor

Staff nurse resistance to work with students:
- Increase the nurses’ workload,
- Decrease the quality of patient care,
- Potentially threaten the nurse’s license if an adverse event were to occur. (Hawthorn et al., 2009)

Solutions to alleviate vertical violence between staff and students included:
- Support from nursing faculty as well as hospital administration,
- Clear communication between the student and nurse, and
- Mentor education for staff nurses who choose to work with students (Matsumura et al., 2004)

Research Proposal

- Descriptive survey quantitative design
- Implementation of mentor education program at San Francisco General Hospital
- Strategies in increase communication and incorporation of students
- Pre/Post test survey

Indications For Clinical Practice
- Decrease vertical violence among staff and students
- Decrease hospital attrition rates
- Promote a safe and positive learning environment for students
- Promote continuing education for staff nurses
- Promote a stronger generation of new nurses
